Single Channel Video
1080p, Stereo Sound, 10.55 minute loop

SECTOR is a series of single screen audio / video works built on cinematic concepts of dis/continuity which reflects our mediated perception of the world. Edited, animated and composited, original video- and audio field recordings are processed and transformed into seemingly erratic content and manieristic appearances.

SECTOR 2c juxtaposes natural forms with man-made structures and abstract grids. It suggests both an architectural space and a void, within which individual elements recombine in seemingly unrelated order.
